PROJECTS

Competition Project

2022

EPAF

-This project was one of my first competition-based project. This project helps our environment where you can report any pollution to its website or android app.

-You can check the source from:

<https://github.com/EnesAgo/EPAF.git>

Hachaton Project

2024

Student Hub

-This project is made in Infomatrix hachaton as a solo programmer in 36 hours

-You can check the source from:

<https://github.com/EnesAgo/infomatrix2024Hackaton>

Private Project

2024

Dentist Appointment App

- This Application is Currently used by dr. Denis Omerov in Dental Clinic New Smile Ohrid

-You can check the source from:

<https://github.com/EnesAgo/New-Smile-Appointment-App>

Private Project

2023

CLI tools

- This project has useful cli tools such as google search from terminal, get weather, crypto market, global currencies, password generator, and a lot more. I use puppeteer to webscrape all the data.

- You can check the source from:

<https://github.com/EnesAgo/cli-ago-google-search-puppeteer>

Private Project

2023

Nafi Kompani Official Website

- I made the official website of Nafi Kompani.

- You can check the website:

<https://nafikompani.com/>

Private Project

2025

Pharmacy App

-This project was created for a university assignment a pharmacy medicine database and search application.

- You can check the source from:

<https://github.com/Mudt-Enes-Ago-Projects-Hw/module-2.git>
